

KIKI DENG

EXPERIENCE

Software Engineer at 100devs 2022.04 – 2023.5

- Designed and built 2 portfolio websites with innovative UX, customized to clients' specialized expertise, growing their personal brands, using stacks as React and Vue. Adapted a mobile-first approach that crafted a smooth viewer experience on all devices.
- Collaborated with developers to build and debug web pages, utilizing Trello to stay on-task and git for version control.

Translator at Hitachi, Ltd 2020.8 - 2021.6

- Translated and proofread company promotional documents, quarterly reports and meeting minutes

Project Manager at Sandu Publishing 2018.7 – 2020.7

- Established a visualized project tracking system that ensured the successful delivery of 34 publication projects on time.
- Implemented a Kanban system to clarify communication and shortened the reporting cycle from one week to 2 days, between an in-house team of 11+, printers, and multiple international publishers from Germany, the United States, Japan, and more.
- Participated in the Frankfurt Book Fair in Germany to negotiate and finalize publishing contracts, resulting in substantial growth in company revenue.

PROJECTS

Eyes On Prize (Fullstack E-commerce Website)

React.js, Redux, SASS, API data fetching 2023.4 -2023.6

Independently developed, tested, and deployed a fully responsive e-commerce website, connecting a client with customers worldwide. Simplified the content management system with Strapi, removing any technical barriers in daily updates. Showcased products efficiently to users through seven categories and multiple filters built with React Router and Axios. Ensured an optimal checkout experience with a state-persisted shopping cart that boosted sales.

Data Eye (Data Tracker Dashboard)

Vue.js, Chart.js, CSS 2023.7 –2023.8

Developed a convenient data tracker, adaptable to various scenarios, enabling users to track and visualize their data. Introduced a bold UX design inspired by brutalism that attracted users and established a clear visual system.

Summary

Creative, detail-oriented, software engineer with a deep passion for UI design. Proven track record of creating and implementing successful front and back end web applications. Excited to bring my skills to a tech company with global reach.
